Certified Project List **Registered Project List**

Thanks for your patience while we restore the LEED Registered Project list. Earlier this year, we sent an email survey to LEED project administrators asking them to update the confidentiality status of their project(s). We haven't heard back from everyone yet, so your project may not be listed. If you'd like it to be, please contact your project administrator (usually the person who completed the registration), who can update the project information at leedonline.usgbc.org. You may also contact LEED staff at leedinfo@usgbc.org.

Simply click on the **Search** button for a complete list of registered projects or enter specific search criteria for a filtered list. To view a more comprehensive look at how certain projects were certified, visit the [Project Profiles](#) page
